

Shark Line

Material specific application taps

New products 2018

SHARK LINE

INTRODUCTION

Our material specific application-based range of DIN Shark Taps offer high **performance** and **process security**. This range has been expanded with two new tap designs for blind hole threading up to 3xD in stainless steels and steels.

FEATURES AND BENEFITS

- **COLOR RING CODING**

The color ring on the tool shank identifies suitability for specific materials and enables **quick and easy tool selection**.

- **ADVANCED GEOMETRY**

Significant reduction in axial forces and torque compared to conventional taps. This ensures **problem-free threading** of 3xD blind holes in stainless steels and steels with tensile strength up to 1200 N/mm².

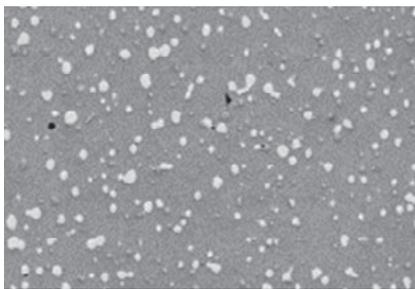

- **EDGE TREATMENT (Red, Yellow, Blue Shark)**

Spiral flute taps incorporate a special edge treatment to increase strength and reduce the chance of micro-chipping on the cutting edges. This considerably improves **performance and tool life**.

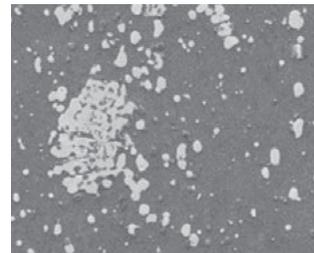

MATERIAL

Shark taps are manufactured from a unique powder metallurgy tool steel different from any other HSS-E-PM. This provides an unbeatable combination of toughness and edge strength, allowing the taps to perform at higher cutting temperatures while offering excellent performance and longer tool life.

Unique HSS-E-PM material used for **SHARK TAPS**
(note the evenly dispersed grain structure)

Traditional HSS-E (M35)
material

GEOMETRY AND CHAMFER

The new E412 & E414 taps feature a 48° spiral flute with constant rake angle and are back tapered. This supports:

- Threading up to 3xD
- Low torque
- Excellent threads at both high and low speeds
- Superior surface finish
- Process security

**STRUCTURAL, PLAIN CARBON & LOW ALLOY STEELS****YELLOW SHARK**

- **SURFACE TREATMENT**

Hard chrome plating (Cr) with an additional edge treatment prevents built up edge when tapping in materials prone to sticking to the cutting edges.

- **FLUTE GEOMETRY**

Available in spiral point for through holes and spiral flute (40° angle) for blind holes. Special flute geometry on Yellow Shark spiral flute taps prevents nest formation of chips, reducing the risk of re-cutting chips on reversal.

- **THREAD FORMS**

Metric and Metric Fine

- **PRODUCT CODES**

E297, E298, E299, E300

YELLOW SHARK**3xD NEW**

- **SURFACE TREATMENT**

TiAlN-Top coating with an additional edge treatment.

- **FLUTE GEOMETRY**

Spiral flute angle of 48° facilitates smooth and fast chip evacuation, making it suitable for threading deep blind holes (3xD). The increased thread relief also enables higher cutting speeds in high strength steels.

- **CUTTING GEOMETRY**

The special 3-radii profile with a constant rake angle all along the flute length leads to a better control of cutting properties and prevents nest formation of chips.

- **BACK TAPERED**

Back taper further facilitates chip evacuation, reducing chipping on the last threads of the taps and also reducing torque when the tap reverses.

- **TOOL HOLDING recommendation**

When using 48° spiral flute Yellow Shark taps, it is recommended to use a tool holder with minimal float or soft start.

- **THREAD FORMS**

Metric

E412

STAINLESS STEELS

BLUE SHARK

- **SURFACE TREATMENT**

Steam-tempered or Super-B (TiAlN + WC/C) coated with an additional edge treatment.

- **FLUTE GEOMETRY**

Available in spiral point for through holes and spiral flute (40° angle) for blind holes.

- **BACK TAPERED**

Back taper on spiral flute taps further facilitates chip evacuation, reducing chipping on the last threads of the taps and also reducing torque when the tap reverses.

- **THREAD FORMS**

Metric, Metric Fine and G(BSP)

- **PRODUCT CODES**

E238, E239, E240, E241, E382, E383, E384

BLUE SHARK

3xD NEW

- **SURFACE TREATMENT**

Super-B (TiAlN + WC/C) coating with an additional edge treatment.

- **FLUTE GEOMETRY**

Spiral flute angle of 48° facilitates smooth and fast chip evacuation, making it suitable for threading deep blind holes (3xD). The increased thread relief ensures process security when tapping resilient materials such as stainless steel.

- **CUTTING GEOMETRY**

The special 3-radii profile with a constant rake angle all along the flute length leads to a better control of cutting properties and prevents nest formation of chips.

- **BACK TAPERED**

Back taper further facilitates chip evacuation, reducing chipping on the last threads of the taps and also reducing torque when the tap reverses.

- **TOOL HOLDING recommendation**

When using 48° spiral flute Blue Shark taps, it is recommended to use a tool holder with minimal float or soft start.

SHARK LINE**ALLOY STEELS****RED SHARK****• SURFACE TREATMENT**

Bright or TiAlN-Top coated with an additional edge treatment.

• FLUTE GEOMETRY

Available in spiral point for through holes and spiral flute (45° angle) for blind holes. Special flute geometry on the spiral flute taps prevents nest formation of chips.

• BACK TAPERED

Back taper on spiral flute taps further facilitates chip evacuation, reducing chipping on the last threads of the taps and also reducing torque when the tap reverses.

• CUTTING GEOMETRY (Spiral Flute Taps)

The special 3-radii profile with a constant rake angle all along the flute length leads to better control of cutting properties and prevents nest formation of chips.

• TOOL HOLDING Recommendation

When using spiral flute Red Shark taps, it is recommended to use a tool holder with minimal float or soft start.

• THREAD FORMS

SIMPLY RELIABLE

As a professional you can judge the quality of work by just looking at the chip. Our chip is a clean and uncomplicated shape that in itself tells a story. It is a clear and consistent signal and that's why we use it as a symbol for being **simply reliable**.
